Town Representatives Meet Calgary Power Co.

Mayor Chambers, Councillors Reiber and Goorder and Secretary W. A. Austin attended a meeting on Wednesday of the representatives of the towns of Lacombe, Innisfail, Bowden, Olds, Didsbury and Carstairs with the Calgary Power Co. to discuss the power rates.

The representatives of the Power Co. stated definitely that it was impractical to make any change in the domestic lighting rates. They stated that they had made a survey of the commercial power users and that they were in favor of introducing a different basis for the service charges for commercial users. The service charge will be based on floor space instead of installation as at present. The basis rate will be 50 watts of installation for every 100 sq. ft. of floor space with a variation for certain classes of businesses.

In answering the claims of the towns that street lighting was too high, the Power Co. proposed to increase one third of the lights in each town from 150 watts to 250 watts at the present rate.

Carstairs Merchant Dies Two Months After Car Crash

William Walter Carter, 38 years, Carstairs business man, died Saturday at his residence following injuries he received in a highway accident two miles north of Carstairs on September 5th. An inquest into his death has been called by Coroner Dr. J. L. Clarke for 10 a.m. Friday, at the town hall, Carstairs.

Carter, accompanied by S. Collier of Carstairs, was standing between his car and trailer about 8:45 p.m. Monday September 5th, when a car coming from behind crashed into the trailer, knocking both men to the ground. Carter suffered a fractured skull while Collier received only minor bruises.

Legion Concert

The Canadian Legion gave their Armistice Day Concert and Dance on Friday and considering the state of the snow covered roads, the attendance was very good.

The Concert which was given by local talent was very much enjoyed. Songs were given by Miss Gladys Geeson and Jack Robertson, trios by Messrs. J. and A. M. Robertson and R. Webster, a skit by the "Three Musketeers" of Carstairs, violin solos by Mrs. Colwell of Cremona, and readings by Miss Alice Weiss. Every number was well received each demanding an encore.

In the absence of Mr. George Clark who was to have given an address, Mr. Jack Robertson spoke on "The Humorous Side at the Front." He recounted many amusing incidents while he was in the army.

Attends Funeral of Mr. E. Pinchbeck

Mr. Norman Clarke attended the funeral of Mr. Edwin Pinchbeck, of Spruce Grove on Wednesday last week.

Mr. Pinchbeck was a very prominent figure in municipal affairs and had just completed his 30th year as secretary of the Municipal District of Spruce Grove and for 15 years was secretary of the Rural Municipal Association of Alberta. He was highly respected by all municipal officials and the executive of the association attended the funeral in a body.

Attend 31st Battalion Reunion

Didsbury was well represented at the annual reunion dinner of the 31st Battalion which was held in Calgary on Saturday. Among those who attended were Chas. Marolin, E. K. Cullen, Pete Miquelon, Bill Gillrie and Norman McLeod.

After Big Game.

Jack Topley, Frank Heselton, Bert Fisher, Otto Mueller, Irwin Klein and Alex Moore left this week for their annual big game hunt at the head waters of the Big Red. Alex Moore left Sunday with a team. Frank Heselton and Jack Topley left Monday by truck and the rest went on Wednesday. They say they will not be back until they get their full quota of game.

Stewart Tighe, Harold Tighe, Ken McCoy and Sam Thompson returned from the Clearwater country on Sunday and had their full quota of moose, each bringing in his game. They have successfully hunted in that district for several years.

WEDDINGS

CHAMBERS—COCKBURN.

On Friday, November 11th, 1938, a quiet wedding took place at the Knox Church, Calgary, when Marie, the eldest daughter of Mr. H. W. Chambers, was united in matrimony with Mr. Jack Cockburn. Rev. Warren F. Kelloway performed the ceremony.

The bride, who was given away by her father, was attired in a grey ensemble with blue accessories. The couple were attended by Mr. and Mrs. Ben Woodworth, of Baillie.

After the ceremony a reception was held at the York Hotel. Besides the immediate family the following guests were present: Mr. and Mrs. C. H. Adshead, Mr. and Mrs. Austin, Mr. and Mrs. Ed Ford, Mr. and Mrs. George Murray (Bowden), Mrs. McKay, Miss Ruby Sprout and Mr. Boyd Ausmus.

Following a short honeymoon Mr. and Mrs. Cockburn will reside in Didsbury.

A quiet wedding of interest to many was solemnized at Olds on November 1st at 3 o'clock by the Rev. Father McLellan of Olds when Bertha Lorraine, the third eldest daughter of W. C. Moon of Didsbury was united in marriage to Mr. James A. E. Nelson of Calgary, the third son of Mr. and Mrs. Nelson of Ogden.

The bride, who was becomingly gowned in blue crepe and black accessories was given in marriage by her father. The bridegroom, Miss Winnie Moon, sister of the bride, was dressed in yellow with black accessories. The groom was attended by Mr. Riley Moon, brother of the bride.

After the ceremony the wedding party motored to Calgary for a wedding supper at the home of the groom's parents.

After visiting in Calgary for a few days the couple returned to Didsbury where they will reside for the present.

Lady Curlers Will Organize

The lady curlers will meet on Friday evening in the C.P.R. waiting room at 8 o'clock to organize for the coming season. All ladies who are interested are invited to attend.

Evangelical Church Notes

Next Lord's Day the pastor will speak in the morning from the subject, "Cultivating the Lord's Vineyard." The evening subject is "The One Way of Divine Acceptance."

You are all invited to each of these services as well as to the prayer service on Wednesday evening.

Knox United Church Notes.

The services next Sunday will be in charge of the minister who will discuss the church struggle in Germany under the title, "Cross and Swastika." A cordial invitation is given to all.

Gypsy night tonight
at Knox United Church

Elevator Men Organize.

A meeting of about 30 elevator operators met at Carstairs on Wednesday last week and organized Group No. 3 of the Brotherhood of Elevator Operators. Group 3 will take in all the elevators from Balzac to Minaret and points west on the Cremona line.

Mr. Sam Nelson and Mr. Wardle of Penhold outlined the plans of the organization, which includes the earlier closing of elevators during the harvest season and to control the amount of collections that the elevator men are required to make.

E. Donnelly of Carstairs was elected provisional president and N. A. McLeod of Didsbury provisional secretary.

Social Credit Will Hold Convention

The constituency convention of the Social Credit Party for the Didsbury riding will be held at Three Hills on Thursday, November 24th at 2 p.m.

In the evening a public meeting will be held when a cabinet minister, together with C. E. Johnson, M.P., and E. P. Foster, M.L.A., will speak.

Burnside Notes

Mr. and Mrs. Lewis McCulloch and family of Turner Valley, spent a few days visiting relations here. They were accompanied on their return to the Valley by Mrs. McCulloch's father, Mr. Harvey Viney who will spend a couple of weeks with them.

Mr. Jack Clark, principal of the high school at Langdon, was a weekend visitor at his home here.

Mr. Otto Bittner spent Monday in Calgary.

Mr. and Mrs. Joe Davidson and family left Thursday to make their home in Kamloops, B.C.

Mrs. N. Eckel, Robert Eckel and Gus Bittner were Sunday afternoon visitors with Mr. and Mrs. Otto Bittner.

A very pretty wedding was solemnized at Clairmont, in the Peace River district on October 21st, when Mr. Robert Spragg, eldest son of Mr. Albert Spragg, was married to Miss Clara Dickson, of Clairmont. The young couple will make their home on the groom's farm at Hythe. Congratulations.

Calgary Visitors at Eastern Star

About 80 visitors from three different chapters in Calgary attended the meeting of the Eastern Star which was held here on Tuesday evening. An exemplification of the degree was given and after lodge a "pot luck" supper was served.

Neapolis Teacher In Stove Accident

Frank Low, teacher at Neapolis school, was the victim of a severe scalding last week Monday when a tin on a stove at the school blew into the air and the water which it contained poured over the entire top part of his body. The accident happened when Mr. Low attempted to knock a lid off the tin can while it was on the stove. Being at about the same height as his head, the lid blew off and the water, at boiling point, blew into the air and came down upon the teacher. Immediately he asked some of the pupils to put water in his car and he drove to the farm home where he was boarding. He was taken to Didsbury Hospital.

If in need of heavy clothing for winter wear, it will pay you to deal at Scott's.

NOTICE TO FARMERS and TRUCK DRIVERS

Starting on DECEMBER 7th all grain elevators in Didsbury will be closed on Wednesday afternoons at 1 o'clock.

Air-Mindedness Needed

The very recent inauguration of a transcontinental airways express service in the Dominion marks not only a very important milestone in the history of transportation in this country, but also a very valuable contribution to the commercial and industrial life of Canada.

The word "milestone" is particularly appropriate term to apply to this new development in transport facilities in this country, for the relative rapidity with which new and high-powered airplanes gobble up the miles in their cross-country flights constitutes a promise of big developments in the commercial life of the country in the next few years.

Hard on the heels of the initiation of an airways express service is to come the daily transport of passengers in these pullmans of the sky; in fact, such service may actually be in effect by the time these comments appear in print.

The next step, and this is not likely to be far distant, is the linking up of the Trans-Canada Airways system with the British Imperial Airway lines, thus affording through aerial mail, express and passenger services between centres throughout the Dominion and the important cities of Great Britain and other units of the Empire. These lines are destined to be linked together to form a vast Empire network of rapid transportation of goods, mail and passengers.

With feeder lines operating in the various countries forming the Empire, the time is approaching when it will be possible to fly on a single ticket from any important centre in the Dominion to almost any important city in any other part of the Empire, or vice versa.

Greater Capacity And Speed

Just how soon these ambitions are to be realized to the full it is a little difficult to predict, but the rapidity with which progress in this direction is now being made in a country which has hitherto lagged behind, it may safely be assumed that it is not far distant.

Coincident with this phase of development in the field of commercial aviation in Canada and other parts of the Empire is a marked progressive acceleration in the capacities and speeds of the ships of the air destined to carry much of the mail, express and passenger business of the future.

Here again, it is difficult if not impossible to predict what the limitations in either speed or capacity may be. In the upper lanes of the airway traffic of the future, great speeds can be attained, experts declare. A rate of flight of 400 miles an hour has already been achieved and a 12-hour schedule between Montreal and Toronto and London, England, in the near future is by no means beyond the realm of practicability.

Nor is the prediction that the time is not far distant when craft in regular service will be capable of carrying 100 passengers at one time outside the range of possibility or even probability. Experts state that aircraft of substantial capacity are essential if long distance flying on regular schedule is to be provided at economic rates and much research and experimentation along these lines is being conducted by officials and experts of the principal air lines of the world.

Safety Must Be Assured

One other factor that is essential to the successful operation and maintenance of commercial aviation on large scale basis is safety for the passengers. In this connection strenuous efforts are being made to overcome the not unnatural qualms of those who have yet to make their first trip aloft, and that means by far the great majority of the travelling public.

Statistics show that in this field considerable success has been achieved and some of the European and American companies can point with justifiable pride to a fine record of freedom from accident involving loss of life or injury. When the number of miles flown and the number of passengers carried, together with the infancy of this field of the transportation industry, are taken into consideration, the record may be regarded as a triumph of scientific engineering and human ingenuity.

Insofar as the Canadian service now being launched is concerned, extraordinary efforts have been made, and are being made, to ensure the safety of the passengers of the future, and tributes which have recently been made to the care exercised by those responsible for the organization of the service, the preparation of equipment, landing fields, safety devices and all the arrangements and plans which have to be made in advance of such a great undertaking, appear to be well justified.

Concurrently with the efforts being made to provide for a service at charges within the range of the average traveller's pocketbook, a campaign is being conducted in an effort to make the public air-minded.

Unfortunately for these efforts, the occasional crash is still regarded as a news event of major importance and is treated as such, and Hollywood producers find that pictures depicting airplane accidents bring good results at the box office.

It may be expected, however, that as experience demonstrates the relative safety of this method of transportation, public confidence will grow and the disappearance of public trepidation will mark the solution of the final problem in the development of this great new industry in this country.

Canada Advertises

A Food Products Campaign Is Put On In England

The Canadian food products campaign in England is "going over," according to a news release. The facts show that poster advertising in large display type and bold colors is being carried on a total of almost 2,500 buses and vans, during a nine-month period, together with feature advertising in the London evening papers and suburban press. This press campaign commenced on September 1 and is to run for a period of six months, covering a circulation of 2,681,292, representing a total of 37,981,685 advertising messages.

Microphone Entertainment

Sir Cedric Hardwicke Deplores Tendency Of The Times

Sir Cedric Hardwicke will not be surprised if the human race becomes deaf and dumb in the next 30 or 40 years if it continues to receive entertainment through the microphone. The distinguished English actor said in an interview at Toronto that the legitimate theatre is the only place left where the audience listens to speech without the aid of an amplifier.

"In every other phase of entertainment people are lost without the microphone," he says. "Why, I even wonder sometimes if half my audience hear me . . . Without the theatre we would be cut from the only real imaginative entertainment."

Now You Tell One

One of Harold Longhenry's Rhode Island hens at Columbus, Ohio, has queer ideas about the shape of her eggs. Nearly every day the size and shape of her egg is different than that of the preceding day. She has laid round eggs, eggs shaped like oversize lima beans, eggs looking like overgrown marbles and long, slender eggs. The color of the eggs varies, seldom being of normal hue.

Lit for the first time 1,200 years ago, a lamp in an old palace at Travancore, India, has never been extinguished. It was lighted in memory of a ruler.

TAKE THE LEAD OUT OF YOUR LEGS

Get Oxygen in Your Blood and You'll Get the Pep that Sends You Bounding Up the Stairs

People who smother to death because oxygen has been completely cut off from them, just as surely you are slowly smothering if your blood lacks red corpuscles. Red corpuscles are your oxygen-carriers. They carry the oxygen you breathe in to every part of your system. Without enough oxygen you are useless, your kidneys, liver, stomach and bowels slow down. Your skin gets pale, flabby, often pimply. Your nerves may become jittery—your tire quickly—feel depressed.

What you need is Dr. Williams Pink Pills. These world-famous pills help make more and better red corpuscles and thus increase the oxygen-carrying power of your blood. Dr. Williams Pink Pills are a prescription drug. See for yourself how quickly this time-proven blood-builder will help give you back your pep.

You'll climb to new peaks of enjoyment when you roll your own with Ogden's Fine Cut. Ogden's is sweeter, cooler, mellow—a cigarette tobacco that steps up smoking pleasure to new highs for those who roll their own. Ogden's Fine Cut with "Chanticleer" or "Vogue" papers—that, sir, is a combination you can tie to for rolling cigarettes that always satisfy!

U.S. Gold Hoard

Holds More Than Half Of All Monetary Gold Of The World

The United States treasury disclosed that its gold hoard was about \$14,000,000,000—more than 55 per cent of all the monetary gold in the world.

The United States' holdings grew enormously during the European war crisis, when gold was sent to buy dollar credits. Since September 1, the treasury has acquired \$872,768,635 worth of the metal, more than during any similar period in history.

Most of the treasury gold has been converted into cash by the issuance of paper currency against the metal. However, the department has retained \$626,778,907 worth in an unobligated fund from which it could supply overseas investors who decide to take their money home.

The latest Federal Reserve Board estimate of the world's monetary gold stocks was \$23,803,000,000, of which England and France each had about \$2,500,000,000 and Holland about \$1,000,000,000. The total European gold stocks just before the war crisis was estimated at \$9,114,000,000. These figures do not include substantial hoards by private persons.

A Necessary Industry

Agriculture Should Be Recognized As Such In Canada

The farm problem is universal and nations have attempted to solve it each in their own way. For us in Canada a government bonus is not the solution, neither is price fixing, state control nor a wishy-washy policy of government paternalism. The remedy must be based on the recognition of agriculture as an industry and the right of farm people to enjoy the same opportunities and economic advantages that are within the reach of other social and industrial groups. If agriculture cannot survive on that basis it will have to decline. It cannot prosper on any other basis, for the financial resources of Canada are not sufficient to support agriculture as a bonused industry. Farmer's Advocate.

Forefather Of Glider

Gliding was practised in Bengal more than 1,000 years ago, it was reported recently to the Royal Asiatic Society of Bengal by M. Hidayet Hosain in Calcutta, India. Abdul Kuanim Abbas bin Firnas, who died in 888 A.D., had built and flown successfully the forefather of the modern glider.

References In Italy

Football referees in Italy have just been given powers almost equal to those of policemen. A decree just issued in Rome by the Italian government grants them "police powers," appoints them "public officers" and permits them to arrest any spectator using improper language, making vulgar gestures or throwing things.

Canada leads the world in the production of nickel, asbestos, cobalt and newsprint.

A Sensible Suggestion

That Coronation Train Be Used For Royal Trip Across Canada

On their three weeks' visit to Canada next summer the King and Queen in their travels from coast to coast will spend most of their time on trains. In this connection a report from Ottawa says: "A train adequate for the royal party would cost in the neighborhood of \$1,000,000 without the locomotive." This appears like an outside figure, but even half of this amount seems a high price to pay for the convenience and comfort of Their Majesties. We doubt if the King and Queen would be pleased at such an outlay on their behalf.

There used to be a royal train in the Old Country; maybe it still exists. If it does, it might be placed on a boat and brought to Canada for the visit. A couple of years ago the Royal Scot was shipped to Canada, toured the Dominion and the United States and became a valued attraction at the Chicago World's Fair.

Next year the Coronation, a still more modern train than the Royal Scot, will be brought to the United States as a display at the New York World's Fair.

Why not make arrangements to have the Coronation train come to Canada while the King and Queen are here for their use in their trip, which will likely take them into every one of the Dominion's nine provinces?—St. Thomas Times-Journal.

SELECTED RECIPES

RAISIN PIE

1½ cups seedless raisins
1 cup boiling water
½ cup white sugar
½ cup Bee Hive Golden Corn Syrup
4 tbsps. cream or milk
2 tbsps. St. Lawrence or Durham Corn Starch
2 eggs
1 tbsp. butter
2 tbsps. lemon juice
2 tbsps. grated rind
½ tsp. salt

Cook raisins in water until tender. Mix corn starch with half the sugar and all the milk and stir into raisins, stirring constantly until thickened. Add corn syrup. Beat eggs, add remainder of sugar, salt and lemon juice. Add to raisins. Cool slightly, then bake between two crusts in hot oven.

FRESH PEAR AND GRAPE DESSERT

1 package Orange Jell-O
1 pint hot water
1 cup halved white grapes, seeded
1 cup diced fresh pears

Dissolve Jell-O in hot water. Chill. When slightly thickened, fold in fruit. Turn into mold. Chill until firm. Unmold. Serve with plain or whipped cream, and garnish with grapes. Serves six.

Clever Interpreter

Dr. Schmidt of the German foreign office, who did most of the interpretation between Mr. Chamberlain and Herr Hitler, is said to be the best interpreter in Europe. Its seven principal languages are to him as a child's primer.

In winter, zoo polar bears avoid water altogether, in spite of the fact that they swim in icy waters the year around in their native lands.

It is said that the river Nile has a greater variety of fish than any other river in the world.

The Ob river, in Siberia, is the third longest in the world.

IT POURS CLEANLY

Attracts Many People

Horse Sale Draws Lookers-On As Well As Buyers

There seems to be no way of accounting for the popularity of a horse sale. People may prefer to drive automobiles, they may prefer to work with tractors; they may prefer to ride bicycles to horses, but they just cannot be kept away from a horse sale. The one in Moose Jaw, Sask., this year was no exception; the seats were crowded with people who had no intention of buying a horse. In fact the situation became so acute that legitimate buyers could not squeeze in and the police and management went into a huddle as to the best method of ejecting the lookers-on and injecting horse buyers. The only solution would seem to be a charge for admittance, with a rebate on the first purchase.

Few At A Time

Bombay claims the world's smallest restaurant, a single room twelve feet long and five feet wide at one end, narrowing down to two feet at the other. The proprietor has to restrict admission to five persons at a time.

CHEST COLDS

Here's Quick Relief from Their DISTRESS!

Rub soothing, warming Musterole well into your chest and throat. Musterole is NOT just a salve. It's a "counter-irritant" containing old-fashioned cold remedies, oil of mustard, and other valuable ingredients, in a clear white ointment.

That's why it gets such fine results — better than the old-fashioned mustard plaster. Musterole penetrates, stimulates, warms and soothes, helping in quickly relieving local congestion and pain. Used by millions for 30 years. Recommended by many doctors and nurses. Made in Canada, in three strengths: Regular Strength, Children's (mild), and Extra Strong. All druggists, 40¢ each.

Destruction In London By Aerial Armada Might Drive Government Into Refuge

Great destruction in London by an aerial armada would drive the government into refuge in a remote town in England, Scotland or Wales. In the event of land forces ever occupying the country, the capital of the empire probably would be transferred to Canada, with Ottawa as the home of the "Mother of Parliaments."

These are remote possibilities but are part of the plans which government authorities occupied with air raid precaution arrangements are bearing in mind in drawing up schemes for the safe conduct of public affairs in war times there.

During the World War, the French government hastily quit Paris when it seemed that the German advance on the Marne placed the cabinet in danger. The ministers installed themselves, temporarily, in Bordeaux, to return to the French capital when the menace passed.

This would be the same procedure of the British government if London were subjected to continual aerial attack, which could happen only if the mighty air force now being built proved incapable of beating off the air enemy over the English channel or the southern or eastern counties, a temporary move might be arranged to Manchester or Liverpool.

If an enemy army followed up the possible success of an overwhelmingly powerful air attack, the nation's bullock, the very sinews of war, would be shipped from London, mostly probably to Canada.

Only if the enemy succeeded in advancing well into England, it is said in Whitehall circles, would a flight by the government to the Canadian capital need to be envisaged.

Ottawa in any event would be only a shadow capital of the empire, because the government naturally would return eventually to England, once the peace treaty was concluded. No foreign invader would ever contemplate trying to hold London, any more than the Allies in 1918 sought to seize Berlin, it is said.

With the possibility of Canada being chosen as a temporary capital of the British Commonwealth, the plans for the revision of the parliament buildings in Canada are followed in London with the liveliest interest.

Air technicians say the government of the empire could easily be conducted from Canada in an emergency, as progress in speed and endurance of planes, while adding to the potential menace to London, shortens the space between the British Isles and the Dominion and would permit cabinet ministers and chiefs of the high command to keep regular personal contacts in the conduct of war.

Was Once Famous Athlete

Tom Longboat, Former Indian Marathon Runner, Now Street Cleaner

"Thos. G. Longboat, Lab." The Toronto directory, a reporter noted, so lists Thomas Longboat, 30 years ago one of the most famous athletes in the world. At 51, he is a general laborer with the Toronto street cleaning department. In 1906 Tom Longboat left the Six Nation Reserve near Brantford and sprang into prominence as a marathon runner. Among his achievements was winning the Boston marathon in 1907. He represented Canada in many international events.

Longboat retired after several years as one of the world's leading marathoners and dropped into obscurity. During the Great War he served as a brigade runner in France. He tried farming when he returned to Canada, then became a general laborer. On one occasion 100,000 citizens welcomed Longboat on a visit to Toronto. Few now recognize him as he goes about his duties.

The Smallest Recruit

Shafko Imerovitch (20), called up under Yugoslav conscription law, has set the authorities a problem. He is only 38 inches tall. The authorities probably hoped that he would fail the medical examination, but he passed it with flying colors.

The larger whales, in the prime of life, increase more than 100 pounds in weight every day.

South African Centenary

Discussion Arises Over Growing Beards For The Celebration

While hundreds of Afrikanders (descendants of early Dutch) throughout South Africa are enthusiastically growing beards in honor of celebrating the centenary of the Great Trek of 1838-40, a discordant voice comes from a well-known Afrikaans-speaking man in Paarl, Danie J. Basson.

"I may be wrong," Mr. Basson said, "but it seems to me that this beard-growing for the Voortrekker centenary owes its origin to pure laziness and slovenliness . . . It is clear that the man who fails to grow a beard within a short time will no longer be regarded by a certain section as a true Afrikander. I hope that the tribute that is due to our great forefathers will in future be preserved against the tragic mockery which is now being indulged in."

However, Mr. Basson's views are not very popular. One man said: "Mr. Basson has missed the point entirely. The spontaneous decision in all parts of South Africa to grow beards for the Voortrekker ceremony is a genuine tribute to the memory of the Voortrekkers."

The Cape Argus remarked editorially:

"Fashions in 'face-fittings' vary widely from century to century, and in itself there is nothing humorous about a beard. It just happens, unfortunately, that beards are out of fashion today, and any adornment that is hopelessly out of fashion provokes mirth. While the individual may live down the chaff of his friends, mass-production means mass-mirth.

Unless the fashion itself is changed—which Heaven foreordained!—the more beards, the more jokes."

Steam As Driving Power

Principle Was Known Sixty Years Before James Watt's Invention

A rather awkward steam engine was used in England to pump water out of mines for sixty years before James Watt was startled by the blowing off of the lid of his tea kettle.

The principle of using steam as a driving power was already known, but very little had been done about it because there was little need of steam engines—except to keep mines from flooding. England, like the rest of the world, was a land of household industries; women in cottages spinning yarn and weaving cloth, men making hats or shoes in tiny shops. What use would a steam engine be to them? Watt's invention came into existence just before the industrial revolution; just at the time when factories were displacing the cottage industries. Steam and coal became the basis of England's industrial supremacy and worldwide trade.—The New Republic.

Fall Grazing

The general practice among farmers of pasturing hay meadows in autumn is to use the second growth for livestock without giving any consideration whatever to the effect this grazing may have on the crop of hay produced the following year. The facts show, according to experimental stations, that different crops respond differently to fall grazing. Yields of two tons per acre have been recorded with grasses like timothy and brome, under favorable conditions. Autumn grazing, if properly done, benefits rather than harms grasses, and all do best if they go into winter with three or four inches of growth.

A Valuable Spoon

A Henry VIII spoon, six inches long, weighing only one ounce, and made in 1509, has been sold at an auction in London for approximately \$1,600. It was discovered 16 years ago when an old oak floor was removed from a manor house in East Dorset.

The breast muscles of a bird are about 100 times more powerful, relatively, than those in a man.

Most emeralds are produced in Colombia.

Longevity Of Birds

Cockatoo In London Zoo Reported To Be 184 Years Old

A 134-year-old sulphur-crested cockatoo, just received at the London Zoo, probably holds the world's record for longevity in a bird.

It is carrying its years with both dignity and enjoyment.

The cockatoo presented by Mr. C. R. Urwin was received by the donor from a female relative in 1909, who had kept it for 20 years.

She received it from her grandmother, who had possessed it ever since she was 22 until her death at the age of 87, and she in turn had received the bird from her mother, who had kept it over 20 years.

The whole subject of avian longevity has been studied by Major Stanley Flower over a period of many years.

Records of every zoo and nearly every private aviary have been explored in order to obtain well-authenticated figures.

One meets with some very surprising figures.

The raven, for example, shares with the common carp and certain animals quite a fallacious reputation for enjoying an overripe old age, but the oldest raven whose age is definitely known died in the Zoological Park at Washington when nearly 25 years old and showed every sign of senility.

This is far surpassed by a carion crow which graced a chateau at Blois on the Loire for nearly a century.

Parrots as a class are probably outlived by the birds of prey, thus shaking the theory that vegetarians tend to live longer than flesh-eaters.

Many Griffon vultures have been recorded to have reached the half-century or more. One kept at Vienna in 1700 died in 1824.

Cage birds, so often subject for sentimental commiseration, are often long-lived.

Major Flower's list gives greenfinches of 19 years old, several sparrows of over 20 years, and a red-crested cardinal of 30.

As the author says, the house canary must be considered on a different footing, firstly because they are so easily replaced that the identification of a particular individual in many cases after a lapse of time is a matter of doubt.

Inquiries, however, show that 15 years is a good average age for a canary, though a cock bird owned by Sir Gordon Nairne lived for 22 years, singing lustily to the last.

The large flightless birds—ostriches, cassowaries, penguins, etc., live to a considerable age. Two emus kept in France were still breeding when over 40.

The oldest penguin in this country is "Ann," a female king penguin, who has graced the Edinburgh Zoo for nearly 25 years. She is 26 years old and in 1937 successfully raised a chick.—London Observer.

Greengrocer: "Any horseradish, madam?"

Young Bride: "No, thank you. We have a car."

Motion picture machines have been installed in 17,000 schools in Germany.

World's Wheat Production For This Year Estimated As Largest On Record

Schools In Aviation

Canada Would Make Ideal Training Ground For Pilots

Every indication is that Great Britain is arming faster and more anxiously than ever. Sir John Simon, the second-in-command in the British government, uttered these ominous words:

"Preparedness now is more essential than in 1914, for the Great War worked up to a climax. Now we must face the possibility that the climax will come at the beginning, and we must be sure we can stand the initial assault."

Sir John must have been thinking of air power. In sea power, Great Britain is already fully prepared, and there is no idea at present of her again sending an expeditionary force to the Continent. There is talk of a preliminary canvass of the manpower in the British Isles, but Premier Chamberlain pledged himself before parliament rose that there would be no conscription in peacetime, so long as he was Prime Minister.

This emphasis on air power is particularly welcome in Canada. We have already organized, under the leadership of some of our best business men, to produce bombers in this country for the defence of the empire.

We may also get schools in aviation one of these days; all on the basis that the British supply the money, the instructors, the "know how"—and we supply the air. The Canadian government will exercise its constitutional right to share in the control of these schools—and in taking the bows—and there is no doubt that many a spirited young Canadian will volunteer for training. But the air arm is made to order for Canadian participation. It will not call for or permit mass enlistment. Only the few who passionately clamor to go can go. Yet the birdmen may win the next war.—Montreal Star.

Durum Wheat Crop

Similar In Quality To That Of Last Year

The 1938 western Canada amber durum wheat crop is similar in character to last year's crop, states the third annual report on quality of durum wheat which was released by the Canadian board of grain commissioners.

Chief degrading factors of both years were improperly ripened, cracked and broken kernels and black point infection.

The current crop is estimated at 22,000,000 bushels compared with about 30,000,000 for the previous year.

Sometimes fun is what a guy who is going to have a headache next morning thinks he's having.

The output of blood by a human heart is about four quarts a minute.

Cross Stitch These in Wool or Silk

PATTERN 619

Household
Arts
by
Alice
Brooks

Lively
Motifs
Easy to
Do in
4 to the
Inch
Crosses

"The bigger—the better" holds for this cross-stitch—it's 4 to the inch. You can imagine how quickly this gets done, particularly since you use a heavy floss or wool. You can make a lovely pillow with matching scarf for living-room or library. The speed of the work will fascinate you. Pattern 619 contains a transfer pattern of 7 motifs ranging from 3½x6 inches to 9½x13 inches; color schemes; illustrations of stitches; materials needed.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

The United States agriculture department estimated that world wheat production for 1938-39 would be 4,365,000,000 bushels, largest on record.

This is an increase of about 20,000,000 bushels over the department's estimate made a month ago and about 525,000,000 bushels greater than the 1937-38 harvest.

The department said total world supplies were approximately 4,960,000,000 bushels, or about 600,000,000 greater than a year ago.

Consumption of grain during the present marketing season may approximate 3,830,000,000 bushels, which would leave a surplus of about 1,165,000,000 bushels in July, 1939. Highest surplus on records was 1,185,000,000 bushels in 1933. The department said total United States supplies now were indicated to be 1,094,000,000 bushels. It is said if domestic consumption approximated the 700,000,000 bushels used last season and exports totalled 100,000,000 bushels, the American surplus next July would be close to 300,000,000 bushels, compared with a record surplus of 378,000,000 bushels in 1933.

Remaking A Name

Great Polish Actress Did Not Object To Changing Hers

When Mme. Helena Modjeska first arrived in the United States her name was not the beautiful one which people soon learned to love, but was "Modrzejewska"; in fact, that name ever remained her professional one in the theatres of her native Poland and in Europe, where she attained some of her greatest triumphs and honors long before she dreamed of conquering a new world.

It was John McCullough, the noted American tragedian, with whom she first acted in San Francisco, who decided upon her new name. When confronted with "Modrzejewska," he said to her: "Who on earth could read that, madame? I fear you will be compelled to change your name."

She suggested "Modjeska," which McCullough smilingly said would remind the public of "Madagascar." The "g" was then alternated to "j."

"Now," the tragedian said, "it is quite easy to read, and it is beautiful to the ear."

And thus the name "Modjeska" was made, and lived to twinkle over half the world.

Not Considered A Menace

Two Investigators Decide B.C. Has No Japanese Problem

Japanese in British Columbia no longer can be considered a menace or even a serious problem, two investigators declare in "The Japanese Canadians," an exhaustive study of Japanese in Canada just published by the University of Toronto press.

The investigators reach the conclusion that even if 150 immigrants continue to arrive annually as they do under the present agreement with Japan, they will not add materially to the population growth of the Japanese in British Columbia, especially as compared with the probable growth of all other groups in the province.

The writers are Charles H. Young, who has studied various foreign populations in western Canada, and Dr. Helen R. Y. Reid, a prominent social worker. Prof. W. A. Carrothers, former chairman of the economic council of British Columbia, wrote a supplementary section on "Oriental Standards of Living."

Redheads Seem Strongest

Blondes are most easily rendered unconscious by anaesthetic gas, declared a speaker at the British Medical Association conference near London. The average speed at which fair-haired persons become unconscious under gas is 52 seconds. Dark-haired ones require 62 seconds and "redheads" 68.

The oldest Canadian locomotive in existence, the "Samson," is the property of Nova Scotia. It was built in England in 1838.

A bee has two kinds of eyes—three small ones and two enormous ones.

The World of Wheat

By H. G. L. STRANGE

Director "Crop Testing Plan"

Twenty years ago the blessing of
peace descended upon a war-weary
world.The peace had been won by the
soldiers of the allied armies who for
four and a half years had endured
the most acute hardships and sufferings.
The allied soldiers won back
the land the enemy had conquered,
made him sue for peace, disarmed
him and then occupied his territory;
and afterwards, by their good be-
haviour and by their fair and kindly
treatment, the British soldiers won
the high regard, the respect and es-
teem of the enemy people.Now the world is re-arming on a
scale greater than ever. The people
of some countries have been required
to give up butter for more guns, and
soon we may all be asked to give up
butter and even bread for more ar-
maments, and the sons of the old soldiers
will no doubt be called upon to fight
the very same war all over again.Pondering over all this, the war
veterans at an Armistice Day Re-
union, in Winnipeg, thought that the
politicians of the world should be
required to give an accounting of
what they have done with the Vic-
tory and the Peace that was handed
to them for safe-keeping by the allied
soldiers twenty years ago.Following factors have tended to
raise price: U.S. Department of Ag-
riculture predicts reduction in U.S.
seeded wheat acreage -- India con-
tinues to buy Australian wheat -- Light
frosts reported in Argentina -- Rain
needed in Russia -- Considerable
drop in Australian shipment -- Rains
delay milling of rice in De-
merara, British Giana -- India ex-
periences poor monsoon (rainy season).Following factors have tended to
lower price: Roumania raises wheat
subsidy -- Steamer charters in ex-
cess of export business results in un-
sold cargoes -- France closes colonies
to foreign wheat imports -- Argen-
tine wheat cutting begins -- Rains
relieve U.S. drought situation --
Private Argentine wheat estimate of
807 million -- Change in official ex-
change rate of Argentine peso.**Westcott Notes**On Monday Evening, October 31
some of the young folks of the dis-
trict gathered to charivari Mr and
Mrs Maitland Perrin. The game
of "Cooty" was played until mid
night after which Mrs Perrin served
a dainty lunch. All departed at
late hour wishing Mr. and Mrs. the
best of luck.On Wednesday evening, Novem-
ber 2nd, at the Westcott school a
shower was held in honor of Mr
and Mrs M. Perrin and also to wel-
come Mrs Perrin to the community.
After a short program consisting of
community singing and solos by Mr
Webster, Clifford Murphy and Mrs
Henry Snyder, Mrs. Perrin was
called on to open her parcels. She
received many beautiful and useful
gifts. Lunch was served after which
all wished Mr. and Mrs. Perrin
many years of happy married life.**Send Your Membership

"Finish" has been written by the Privy Council in London, England, to Alberta's constitutional appeals involving bank taxation, credit regulation, and press control. The appeals were heard last July. Of the three submissions, only the bank taxation appeal was heard by the judicial committee. It was rejected in an oral judgment on July 14th. Their lordships declined to hear arguments on the other two on the grounds that they were inoperative and of no practical interest. In a written judgment Lord Maugham, the lord chancellor, giving reasons for dismissal of the taxation references, said that there is no escape from the conclusion that instead of being in any true sense taxation to raise revenue for provision purposes the bill is merely:

"Part of a legislative plan to prevent operation within the province of those banking institutions which have been called into existence and been given the necessary powers to conduct their business by the only proper authority—the parliament of Canada."

This, their lordships contended, was sufficient ground for holding the bill ultra vires.

Announcement that the Alberta government will pay transportation and feed bills for four carloads of the three breeds of purebred commercial cattle popular in the province if they were sent to the Golden Gate Exhibition at San Francisco in February was made by Hon. D. B. Mullen, provincial minister of agriculture, last week.

Odd Fellows in Alberta will be interested to learn that General Geo. L. Breiel, special deputy of the Grand Sire of the Sovereign Grand Lodge, will visit this province this month. Arriving on Thursday, Nov. 24th he will broadcast over CJCJ at 8 p.m. On the 25th at 8 p.m. there will be a general conference in Calgary, to which all Odd Fellows are invited. In the evening he will address a public meeting.

Two additional cases have been added to the unusual number of instances this year in which Boy Scouts have improvised a tourniquet to control serious loss of blood following accidents. When a Windsor (Ontario) boy playing corner lot football fell on a jagged piece of milk bottle and suffered a deep 9 inch cut in his calf, Scout Alan Wilkinson promptly applied a handkerchief tourniquet and possibly saved the victim's life. In the second case Scout Harold Garside of Hesseler, Ontario, out hunting, was accidentally shot in the leg by a companion with a shotgun. The Scout himself applied the tourniquet with the help of his companion.

SHE COULD NEITHER WALK NOR SLEEP

Arms and Feet Swollen With Rheumatism

This woman suffered for many years. Pain sapped her strength until she lost hope of recovery. Many remedies were tried, but nothing broke the grip of her crippling rheumatism. At last her husband persuaded her to try Kruschen Salts:

"My arms and feet were swollen with rheumatism," she writes. "I could not walk nor get regular sleep, and nothing did me any lasting good. I was so hopeless of ever getting better, I lost my good nature entirely. Then my husband persuaded me to try Kruschen Salts. After two weeks I began to feel better. I persevered, and in six weeks I was doing housework. Later, I was able to go for a walk. Now I am free from pain and I feel grand!"—(Mrs.) F.W.

Rheumatism is commonly caused by deposits of uric acid crystals, which lodge in the muscles and joints. Kruschen helps to break up these deposits of troubling crystals and to convert them into a harmless solution, which is removed through the natural channel—the kidneys.

WORLD HAPPENINGS BRIEFLY TOLD

Ernst Freud, son of Dr. Sigmund Freud, father of psycho-analysis, has applied for naturalization in England.

A 10-hen pen of White Leghorns entered at Agassiz by a veteran British Columbia poultryman set a new world record for egg-laying pens.

A Yugoslav army colonel, lieutenant and sergeant froze to death on patrols as heavy snowfalls swept mountain regions.

Argentina has sown 20,875,000 acres of wheat for the current crop, an increase of 825,000 acres over advance estimates, the international institute of agriculture reported.

Thirteen nations, including Britain, France, Germany and the United States, are entered in the sixteenth international aero show to be held in Paris.

The Blood Transfusion Service of the British Red Cross Society is planning to store human blood in thousands of milk bottles for use in event of war.

The newspaper Paris Midi said Premier Edouard Daladier's government has decided to revive the practice of shipping French convicts to the dreaded Guiana islands.

Needy mothers in the province of Quebec will receive a monthly allowance of \$40 to \$60 starting December 15, Hon. William Tremblay, provincial minister of labor, announced.

The death was announced in Vienna of General Arthur von Schuschnigg, father of Kurt von Schuschnigg, last chancellor of independent Austria, who still is held in custody by German police.

Ships With Old Names

British Battleships That Have Had A Long History

In the naming of new battleships there has been a reversion to former practice, earlier post-war ships of this class having been named either after members of the royal family or after distinguished admirals. Lion, Temeraire, and also Implacable are famous names of ships of the line in the old sailing navy, and their revival should be popular.

Fifteen ships have been called the Lion since the early sixteenth century, and the last, which was the battle-cruiser flagship throughout the war of 1914-18, was disposed of in accordance with the Washington Naval Treaty of 1922, as were the Temeraire, a battleship which had also served in the Grand Fleet throughout the war. It is just a century ago that the towing of the Trafalgar Temeraire to be broken up inspired Turner's famous picture.

Two ships have been called Implacable, the first, which fought on the French side at Trafalgar as the Duguay-Trouin and was captured later, being still in existence as a youths' training ship at Portsmouth.—London Times.

Thousands of gold sovereigns were carried by air freight recently from Croydon, England, to Amsterdam, Holland.

The apple tree develops and grows more rapidly than any other fruit tree.

Study World Problems

Canadian Institute Of International Affairs Issues Report

There never was a time "when an understanding of international affairs was more urgently needed than it is today," E. J. Tarr of Winnipeg, president of the Canadian Institute of International Affairs, declares in a preface to the report of the institute's work in 1937-38.

The Canadian institute, founded in 1928, is an unofficial and non-partisan national organization with branches in 16 of the principal Canadian cities. Its object is to encourage study of international affairs in Canada.

Membership increased from 885 to 1,061 during the year. Branches held 221 private and confidential meetings as well as 87 meetings of small study groups. Mr. Tarr said the institute continued to follow "what will probably always be its primary purpose, that is, the enlightenment of its own members in the field of international relations, particularly as they relate to Canada."

The report referred to publication during the year of four books dealing with Canadian problems. Four books will be published within the next six months.

Primary function of the institute, the report stressed, is to help individual members clarify their views on international questions. Emphasis is laid on activities of branches, including confidential general meetings where there is ample opportunity for discussion. Other principal activities include conferences—regional, national, intra-commonwealth and international.

The institute's activities are financed out of membership fees, special subscriptions and grants from the Massey Foundation and the Rockefeller Foundation.

Was Given A Chance

And Young Writer Proved Editor Did Not Make Mistake

The managing editor of Messrs. Chapman and Hall, publishers, sat at his desk and pondered, says Vasant Coryell, in Christian Science Monitor. He pursed his lips and looked doubtful. The young man sitting across from him was speaking very earnestly. The managing editor could not help feeling that there was sense in what he was saying. But, thought the managing editor, he is such a young man. Not over three and twenty.

"What I have been writing," the young man was saying, "has been little more than a running comment to Mr. Seymour's drawings. It would be much better if you would let me think up the ideas and let Mr. Seymour illustrate my text."

"But," interrupted the managing editor, "that isn't the way those things are done. Mr. Seymour is a great artist. It is his name and his pictures which sell." He smiled tolerantly at the young man. "You are just a beginning writer. You should be more than content to be allowed to write these marginal sketches for such a great artist as Mr. Seymour. He may be the making of you."

"Or I of him," the young man said under his breath. Out loud he said, "Give me a try, sir. I'm sure I have some excellent ideas."

"Very well," the managing editor said impulsively. "Go ahead."

A few days later he looked upon the fruits of the young man's efforts: the first proofs of "Pickwick Papers" by Charles Dickens.

Sea Mystery

Court Of Inquiry Reaches Conclusions Regarding Fate Of Vessel

A government court of inquiry probing one of the deepest mysteries of the sea has decided the British freighter Anglo Australian, missing seven months, probably broke in half "from deck to keel" after her shelter-deck buckled.

The 5,456-ton vessel, carrying a crew of 39, disappeared last March in mid-Atlantic while on a voyage from England to Vancouver. She was last reported off the Azores, March 14. No trace of her has been found.

The court of inquiry pointed out that more than half the freighter's deadweight was concentrated amidships. It decided that it was unlikely an explosion or collision on the high seas caused the tragedy.

Business executives of Germany are having difficulty in finding young people with sufficient knowledge to fill good positions.

The Human Eye

Science Discovers That They Are Powerful Electric Batteries

Human eyes are powerful electric batteries. This discovery, showing that each eyeball is an independent battery, was announced to the National Academy of Sciences by Dr. Walter R. Miles, Yale university psychologist.

Each eye produces a current averaging 1-1000th volt, an electrical energy equal to that of the heart beats which make the recordings of electrocardiographs. Numerous eyes, Dr. Miles found, average 1-400th volt; one gave 1-100th volt.

The Yale experiments show the electric potential of an eye varies with at least some diseases, both eye troubles and general. But Dr. Miles said it was not yet possible to say whether the electrical variations would be useful for eye troubles.

The fact that eyes produce electricity has been known to science since 1860, when it was discovered in frogs, but the source of this electric power, its variations and especially its high power in human beings, are new.

Sleep does not change the eye current. The blind have it equally with those who can see. What makes the current, Dr. Miles said, was not known.

Explicit Directions

Salvage Company Knows Exactly Where To Look For Necklace

The Boston Globe says a lady who read in her paper that Simon Lake was planning to make an attempt to salvage the Lusitania's cargo lost no time in communicating with the inventor, telling him that she lost a \$10,000 necklace on the Lusitania which she would so much like to have Mr. Lake bring back to her. She gave Lake full directions for locating it. He had only to look under the pillow in her bed in stateroom 357, deck B.

FOR FASHION-ALERT MATRONS

By Anne Adams

Slimming lines, versatility and youthfulness are only three of the chic features that make Anne Adams' new Pattern 4931 really outstanding! Simplicity of making is another attraction—for this becoming frock is wonderfully easy to cut and fit!

Whether in a novelty satin or printed silk, it is a dress to don right now and wear on every occasion all Fall. Just look at the choice of dainty necklines—one with a tie-end collar. And you can have three different types of oh-so-comfortable sleeves. Comfort reigns supreme, too, in the bodice fulness and the inverted pleat of the skirt, while the shoulders "fit" to nicely with those flattering little yokes!

Pattern 4931 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 4½ yards 39-inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Forest Conservation

Timber Wealth Of Canada Has Been Handled Wastefully

Canada's timber wealth had been handled so wastefully that the people are "coming well within sight of the end," Dr. J. R. Dymond, director of the Royal Ontario Museum of Zoology, Toronto, said in an address to the annual meeting of the Association of Audubon Societies in New York.

As active competitors in the lumber markets of the world," Dr. Dymond said, "some prophesy that, at the present rate of consumption and destruction, Douglas fir will be out of the picture in 15 years and white pine in 30.

"Recently the statement was made that many pulp and paper men today admit that, 10 years hence, they definitely will be worried about their sources of wood supply."

Dr. Dymond, speaking on Canadian conservation problems, said one of the biggest problems at present is to bring about adoption of a forest policy that will ensure adequate timber and other products on a sustained yield basis. At the same time, this policy must take care of the other functions of a forest, providing a home for wild life, regulating stream flow and supplying a place for recreation.

Had Unusual Talents

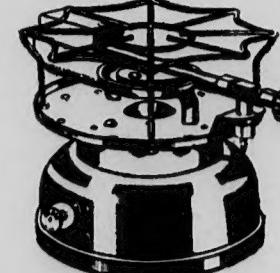

Inventor Of Cotton Gin Made Violin When He Was 12

Years before he had invented the successful cotton gin, which brought him fame and one might say fortune, Eli Whitney, as a mere lad, had displayed unusual mechanical talents in his native town of Westboro, Massachusetts. The townspeople looked upon him as a prodigy, and well they might, for at the youthful age of 12 he made a perfect violin, which gave him a sense of confidence in pursuing his future inventions. He was a serious youth, but not without the joy of creativity in his heart.

Gasoline Stove

A New One-Burner Gasoline Stove Now On The Market

There's always been a demand for one-burner gasoline stove with the advantages of the larger outfits. Now there's one on the market—manufactured in Canada—that's been tested in foreign countries before being offered here.

In its completely new form it is known as the Coleman Speed Master, and beside lighting instantly is safe, windproof, silent and odorless. It stands over 200 lbs. pressure in its triple nickel-plated, rustproof brass bowl.

Ask your Coleman dealer to show you the new one-burner Speed Master.

New Industry Established

England's Flea Farms Provide Food For Tropical Fish

A new industry—flea farms to provide food for ornamental fish—has been established in England.

The flea farms are in the country far from London and were set up after it was accidentally discovered that fleas can be kept frozen for some time without harm.

Frozen fleas look rather like brown sugar. "Fleas in aspic," they are called. Six cents' worth, spread on fine gauze, contain thousands of fleas. Thrown into the warm waters of the tank, they soon come to life. They are considered to be the best food for tropical fish.

Health LEAGUE of CANADA presents TOPICS of VITAL INTEREST by DR. J. W. S. McCULLOUGH

THE COMMON COLD

If the sum total of suffering, inconvenience, sequelae and economic loss from common colds be obtained, it would at once elevate these infections from the trivial into the rank of the serious diseases. The autumn is the time for colds though they may occur at any time of the year. Many of us have from one to three colds a year. One attack produces little immunity.

It is a group of acute infections of the mucous (lining) membranes of the throat and nose, often extending into the windpipe and larger bronchi. The sinuses, that is the hollow spaces adjacent to the nose, are frequently involved. The infection may be confined to the nose, when it is called rhinitis; it may affect the throat as in tonsillitis, or as a pharyngitis; the larynx as a laryngitis and the bronchial tubes as a bronchitis.

The popular idea that a cold is due to a draft is scarcely correct. Exposure to drafts, sudden changes of temperature and chilling of the body are predisposing causes of colds, but no cold can originate without the specific micro-organism or bug which is the essential cause.

Some say that a common cold is due to a virus, that is a germ so small that it cannot be seen under the microscope. Many different germs seem to be associated with colds. Perhaps the cause is a combination of viruses and germs. Common colds may not be a single disease but rather a group of infections which may vary in severity and catchability.

Colds are caught from other persons having colds just as diphtheria is contracted from diphtheria patients. Arctic explorers, exposed to all the conditions popularly supposed to produce colds, do not suffer from these ailments until they return to civilization and become infected by contact with their fellows.

The two really important matters about colds are, first their prevention and second, their cure. Prevention may be summed up in the avoidance of those having an infection, especially in street cars, offices and other poorly ventilated places. Colds, like other diseases conveyed in the secretions from nose and mouth, are often transferred by direct and indirect contact through kissing, the drinking cup, the roller towel, pipes, toys, pencils, fingers, food and other objects contaminated with the fresh secretions which carry the disease. Vitated air, drafts, dust, sudden changes of temperature, exposure to cold and wet, overwork, loss of sleep and improper food all have some effect in causing colds. It must be admitted on the other hand that the most vigorous will contract colds if they receive the infection, while some persons are so immune that they appear to resist attacks of colds year after year.

Persons with colds should at once go to bed and stay there as long as there is any rise in temperature. Methods of cure had best be left to the doctor. Some persons pin their faith to bed, a hot bath and a drink of whiskey. Others use vaccines. There is one vaccine, namely that prepared by Rosenow, which, taken by mouth in doses of ten drops once a week, is said to prevent the onset of a cold, and taken daily in the course of a cold seems to break it up. It is worth trying.

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to The Health League of Canada, 103 Bond St., Toronto, Ont.

After 14 years of electricity, Callington, England, with a population of 1,600, has gone back to gas lighting, with 96 new street lights.

The trouble is that teaching people to read and write doesn't teach them to think.

HEADACHE EASED QUICKLY

Simple Method Shown Here Brings Relief in Few Minutes

1. Take 2 "Aspirin" Tablets with a full glass of water the moment you feel headache coming on.

2. You should feel relief very quickly. If pain is unusually severe, repeat according to directions.

To ease a headache with amazing speed, simply follow the easy "Aspirin" way shown above. Relief often comes within a few minutes.

If this way should fail—see your doctor. He will find the cause and correct it. While there, ask him about taking "Aspirin" to relieve headache and rheumatic pains. We believe he will tell you there is no more effective, more dependable way normal persons may use.

Demand and Get "ASPIRIN"

CHAPTER VI.—Continued

A strange madness overpowered Hammond. He did not know why he insisted; he only realized that his face was hot and his veins pounding.

"Give me that paper," he said thinly. There was something terrible about his eyes. Slowly the girl passed it over to him. His hands shook as he unfolded it, revealing its curt message:

"I.O.U."

Lew."

"I thought so," said Hammond, and turned for the door. Jeanne moved desperately, catching him by the arm.

"Jack! Wait! Wait!"

"Why wait?" he asked. "I'm going after Sergeant Terry."

Quickly Relieves the Pain of BURNS, SCALDS CHAFING

In Burns and Scalds every second counts. So keep a tube of Mentholatum always within reach . . . ready for every emergency. The moment a burn or scald occurs, apply Mentholatum to the affected part and relief will quickly follow. This healing balm soothes the tortured tissues . . . cools and draws out the sting and burn . . . promotes quick, healthful healing.

Mentholatum is used by millions of people the world over for the relief of chafing and chapped skin . . . head and chest colds and catarrh . . . neuralgia, headache, and scores of other uses. Non-irritating—it is harmless to the most sensitive skin and *relief is guaranteed or money back*. Get a 30c tube or jar today.

But she blocked him, frantic, both hands against his chest.

"Oh, don't," she gasped. "Please don't—please don't!"

Jack Hammond could not believe her.

"You're not going to let Lew Snade get away with a robbery?"

"I don't see anything else to do," Jeanne answered hopelessly.

"But—" vaguely Jack realized that he was discussing a situation of which he really knew nothing. "You can't do that. He stole your money!"

The girl sank against the counter.

"I simply can't go to the police. I guess that's why he left that I.O.U.—so I'd know who did it and not make a report."

"Why not?"

She rubbed her hands.

"He still uses his own name."

"What of it?"

She smiled faintly.

"I've changed mine," came at last. "If I had to prosecute him and they took him out to Fourcross—don't you understand?" Plainly Hammond did not and evidenced it. The girl added, in a colorless voice, "If it should ever get back home that Lew Snade had been arrested for stealing money from a girl—somebody would figure out the right name of that girl."

Again there was silence. At last Hammond began to pace the narrow confine between the door and the counter. Then Jeanne said:

"I'd hoped you'd never have to know about him."

"I don't—if you put it that way."

But she had straightened now, her chin lifted with determination.

"I'll feel better if you do know."

He caught her by the arms, clutching them tight.

"Look here!" he asked. "Do you think anything could change my feelings about you—my friendship? Do you? If that's the case, don't tell me. I don't want to know."

"You, of all persons, have the right to know."

She freed herself and walked past him to the door, closing it. Then she turned, leaned her back against it, as though the support would give her needed strength. Suddenly she drew back. A voice had come from outside:

"Hey, Jeanne! What's the idea? Shuttin' that door?"

Involuntarily she opened it. A miner entered from Kay's claim.

"Oh," he exclaimed, "I didn't know you were here, Mr. Hammond."

"Yes, I'm here." It was banal—but there was nothing else to say.

"Miss Kay thought you'd forgotten them nails."

"No—but while you're here, take them." Hammond clawed a double handful of spikes from the keg and passed them on to the miner.

"Tell Miss Kay I'll be down after a while," he commanded.

"Sure," the miner answered and started away.

"Jeanne, why can't I go to Terry about this man? He'd handle it confidentially. Certainly, we've got to do something."

The girl leaned wearily against the counter.

"Not necessarily."

"Why not? What right had he to come here and take money?"

"It gets to be a habit after a while." There was no sarcasm in the statement, only resignation.

"I can't see it. Look here, you've made a start for yourself up here in the North. This fellow can't come out of your past and wreck it, no matter what the trouble—"

"The trouble is," she supplied dully, "that I'm tied to him."

"Married?"

"Worse than that."

"That's none of my business, Jeanne."

She rested her hand on the counter.

"It is, Jack. The subject's been opened. You might as well have it all. Lew and I were kids together in The Pas. You know where that is?"

"Yes—in Northern Manitoba. Quite a town now, with all those mines opening up."

"My father ran a trading store there." It was as though she were in a witness chair. "Neither Father nor Mother liked Lew. I worked in the trading store, especially when Father was up North. Well, this time he had to go into the Arctic circle to trade with the Eskimos. Before he left, he told me that I was to go to the annual fur auction in Winnipeg for him; I know furs. So I went and took \$3,000 with me."

"In currency?" Hammond had begun to see ahead.

"Yes. Father likes cash. Lew fol-

lowed me down there. I was terribly in love with him." She must have caught the look in Hammond's eyes. "Oh, he's changed so much—all in a year. I guess getting hold of that money did something to him."

"Evidently. So, after he met you in Winnipeg—?"

"So—well—" she spread her hands.

"I know." Hammond was trying to make it easier for her. "You were away where nobody would know—and you loved him—and life seemed something terribly precious that wouldn't last—"

"Thanks," the girl answered.

"And, too, I suppose he pulled the old gag—what was the use of worrying your parents by getting married, to say nothing of his poor old mother, who'd never survive the shock—"

"In this case, it was his crippled sister," Jeanne supplied without bitterness. "Oh," she supplemented suddenly, "I'm not trying to say I was led around. Did you ever spend the best part of your life in a place like The Pas? Not the town that it is now—but the one like it used to be?"

"How did Lew Snade get his hands on that money?" Hammond asked bluntly. He felt queerly feverish. The girl went on:

"There wasn't anything at the Winnipeg auction worth buying. Lew argued that we ought to go on to Edmonton—there would be an auction there in about ten days. I wrote home what had happened, about the auction I mean. Then we went to Edmonton. Lew's money was gone. I began to cut into the cash I'd brought along; then one afternoon Lew pretended to count the money to be sure it was all there. I wasn't looking. He shouted that a hundred-dollar bill had flown out an open window."

"I worked at anything I could get in Edmonton until I earned enough for second-class fare to Vancouver. The man in the fur store said he'd never even heard of Lew Snade. I couldn't find a job in Vancouver; finally I got one for a single trip on the Prince Rupert boat, working in the dining room."

"You kept on looking for Snade?"

"I'd been to every dance hall in Vancouver and every gambling joint. Someone remembered him and said he'd gone North. So I kept on asking questions after I got on the boat. One of the girls said she knew him—that he'd gotten her to sneak out after hours and meet him on deck. When I got to Prince Rupert, I asked about a lawyer and someone suggested Mr. Barstow. I was afraid to go to the police."

"Yes. Because of your people—"

"I told Mr. Barstow I'd pay him a percentage on any money he could get back for me. But he said no—"

"Barstow's that kind."

"I lived where I could; for a while I worked in Al Monson's store. I was there for nearly two months, but Mr. Barstow couldn't get any trace of Lew. Then one day, he called me and said Lew was in town—he'd been in Alaska and just come back. I don't know how he found out."

"Barstow knows every ship captain and cabin boy in Prince Rupert."

"I guess that was it. He said Lew had promised to come to his office the next morning and pay back every cent. So I went there. But—"

"He didn't show up," Hammond interjected coldly.

"No, Mr. Barstow had to tell me that he'd skipped out. That's when I first saw you—coming down the stairs from Mr. Barstow's office."

"I guess I know the rest. You haven't talked to him up here?"

The girl glanced at the I. O. U. where Hammond had tossed it.

"That's all," she said slowly. "I don't even know how he got here."

"I do. He came up with the last bunch from Fourcross got in the same night as Bruce Kenning. I know something more. He's going to give you back that money."

The girl flashed before him.

"Don't go to Sergeant Terry! Please! You know how news is the kind that comes out of a new mining camp. It goes all over. If Terry ever took him down to Fourcross—"

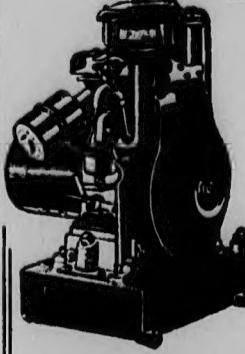

Jack Hammond raised his hand to her shoulder and gently pushed her away.

"I'm not going to Terry!" he announced.

Almost before he realized it, he was out of the store and stalking the crooked streets of the little town, head forward, a queer, ugly swing to his shoulders, as he searched the territory of tents and shacks. Then he turned down to the lake where Timmy Moon, grimy with oil, was working on his airplane.

"Seen Lew Snade?" he asked. Without waiting for an answer, "Where does he usually hang out? Anywhere around this camp? Does

Modernize Your Home With ELECTRIC LIGHT AND POWER At Low Cost

Bring your home, regardless of where located, up-to-date with electric light and power. A Johnson Chore-Horse will supply this the greatest of modern conveniences for as low as \$69.50, all taxes paid, F.O.B. Plant, Peterboro. Light and compact for portability, yet sturdy, strong and precision-built for dependable service, you can rely on

these Johnson Chore-Horse models for consistent electric light and generous supply of power regardless of wind and weather conditions. For charging batteries, for the radio, for washing machines, for electric iron and for many other electrical appliances that city homes have so long endorsed as everyday necessities. Easily installed in basement, garage or other outbuildings, and most economical to operate, a Johnson Chore-Horse will instantly and efficiently supply electric power ranging from 150 to 800 watts 12 months of every year.

FREE FOLDER

A free folder is yours simply for the asking. See the different models—investigate fully the many exclusive features that only Johnson offers and then ask yourself why your home does not deserve this modern power plant?

MEN LOVE GIRLS WITH PEP

If you are peppy and full of fun, men will invite you to dances and parties. BUT if you are cross, lifeless and tired, men won't be interested. Men don't like "quiet" girls. When they go to parties they want girls along who are full of pep.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps nerves and the system, thus lessening discomforts from many functional disorders which women must endure.

Why not try LYDIA E. PINKHAM'S VEGETABLE COMPOUND?

Sold Potatoes From Canada

Canada supplied approximately half of the 2,000,000 bushels of certified seed potatoes sold in the Argentine last fall. In Uruguay, 13,630 crates of the total 95,024 crates (of 110 pounds net) of the seed potatoes imported for the crop planted in January, February, 1938, were also supplied by Canada.

Oh Boy!

No Fleas in Heaven.

Double Feature at Opera House This Weekend Offers "Penrod and his Twin Brother," also "Land Beyond the Law."

Billy Mauch, 13, and Philip Hurlic, 10 year-old coloured actor, are discussing their dog, "Duke" in Warner Bros' "Penrod and his Twin Brother," the picture coming to the movies this Friday-Saturday. "If they killed Duke," says Philip, "would he be an angel?"

"Yeah, I guess he would," replied Penrod.

"He'd have wings and fly all around?" and as Penrod agrees Philip watches Duke scratch a flea. Then he says, "Is there fleas in heaven?"

"How should I know," says Penrod, looking at him disgustedly. "I think he'd know he wasn't in heaven if he had them."

The second feature is "Land Beyond the Law," starring Dick Foran the singing cowboy, in a story of an unlawful cattle country opened up for peaceful, law-abiding settlers, a saga of pioneer days.

Scout and Cub Corner

Scouts will muster at 7:30 tonight at the Legion Hall. Duty patrol: Stags.

CARD OF THANKS

We wish to thank the neighbours and friends for their kindness and sympathy during our recent bereavement, also to the members of the Masonic Fraternity for their assistance.

Mrs. Martha Liesemer and family.

IN MEMORIAM

In loving memory of William Frederick IMM, who passed away Nov. 18th, 1937. We loved him, yes, we loved him,

But Jesus loved him more,

And He has kindly called him

To yonder shining shore.

The golden gates were opened,

A gentle Voice said "Come,"

And with farewells unspoken

He calmly entered home.

—Sadly missed by his loving mother and sisters.
